

CONNECTIVE MOBILE

is a leading provider of mobile marketing solutions delivering Text Messages (SMS) and Voice Broadcasting to consumers. We provide an array of consumer oriented turn key mobile solutions and provide customized services to meet all of the mobile needs of our clients.

REAL ESTATE

How It Works:

Each of your listings will have a unique keyword and a professional yard sign. Potential buyers will text the keyword or call the toll free number on the sign and receive key data about the property and your contact information right on their phone.

Key Features:

- Simple set up-have new listings set up in minutes.
- Potential buyer can instantly connect with the Realtor.
- Texts provide information to buyers in a manner that is easily stored and retrievable.
- Interaction can be customized by Realtor.
- No special software or technology knowledge needed.

Text Facts:

- In June 2007, 28.8 Billion text messages were sent. This is 4 times the amount sent in June 2005.
- One third of all cell phone users send and receive text messages on a regular basis.
- The number of wireless subscribers in the US is now over 255 Million.

*Statistics according to the latest survey from CTIA-The Wireless Association®
